

What are eAudiobooks

eAudiobooks from NetLibrary are digital versions of audiobooks that are available over the Internet from your library. You can search for, check out and download eAudiobooks to your computer through the NetLibrary platform via the Internet.

eAudiobooks can be played on any desktop or portable computer that supports Windows Media Player version 9.0 and above.

Once downloaded, eAudiobooks can be transferred to a wide range of portable devices that support playback of secure or protected wma files—including portable music players and portable media centers from Archos, Creative Labs, Samsung, Toshiba and other manufacturers.

To go portable, transfer an eAudiobook to your portable device using Windows Media Player software.

Enjoy listening to the eAudiobook anywhere.
